January — June 1970

ELECTRONIC DESIGN semiannual index of articles

The articles in the various sections of this index are grouped under key words that indicate their general topics. Articles are listed more than once if they have to do with more than one general topic.

Avionics

AF air-control network almost ready to travel . . . . NEWS, ED 13, p. 22
American Airlines uses 3-D navigation . . . . . NEWS, ED 1, p. 22
An anticollision system for all planes . . . . . NEWS, ED 13, p. 30
Complete guide to technical papers . . . . . IEEE, ED 6, p. U110
F-15's missile sensor tests are under way . . . . . NEWS, ED 5, p. 21
Giant C-5A's instrumentation is readied for tests . . NEWS, ED 3, p. 26
Pilots ask FAA for proximity warner —now . . . . . NEWS, ED 10, p. 32
Spring Joint Computer Conference 1970 . . . . . SR, ED 9, p. C1

Circuits & Circuit Theory

Addition of current source to regulator improves performance . . . . . IFD, ED 1, p. 124
Adjustable time-delay relay is controlled by overload current . . . . . IFD, ED 1, p. 126
An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 6, p. 178
An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 7, p. 50
An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 8, p. 76
An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 9, p. 72
An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 10, p. 98
Any code goes with IC decoder/drivers . . . . . ART, ED 13, p. 74
Assemble a sequential counter . . . . . ART, ED 3, p. 60
Astable multivibrator always starts in same state . . . IFD, ED 9, p. 94
BASIC program designs bias circuits . . . . . IFD, ED 13, p. 92
Boost discriminator performance with a differential capacitor . . . . . IFD, ED 3, p. 71
Boost your DTL efficiency with wired-OR . . . . . ART, ED 8, p. 89
Build better source followers 10 ways . . . . . ART, ED 12, p. 80

XUM

Cascading of broadband amplifiers made easy...NEWS, ED 3, p. 22
Chart speeds the design of single-layer air-core coils.....IFD, ED 6, p. 216
Check flip-flops automatically.....ART, ED 7, p. 66
Choose magnetic deflection.....ART, ED 9, p. 80
Clock and control with TTL.....ART, ED 10, p. 82
Comparator uses NAND gate to prevent oscillation.IFD, ED 9, p. 96D
Data-system activator has hold feature.....IFD, ED 13, p. 96
Decipher the Gray code.....ART, ED 4, p. 70
Decrease driver turn-off time without sacrificing efficiency.....IFD, ED 2, p. 84
Design filters in minutes.....ART, ED 11, p. 86
Diagram sequential logic on a cube.....ART, ED 5, p. 54
Diode protects power supply from short circuits..IFD, ED 8, p. 105
Diodes make good gain-control devices.....ART, ED 3, p. 54
DTL circuit triggers multivibrator and insures starting.....IFD, ED 8, p. 105
Dual-channel i-f strip tracks without gain matching..IFD, ED 13, p. 94
Electromagnetic interference worry you?.....ART, ED 6, p. 199
Electronically tuned notch filter uses FET as a resistor.....IFD, ED 6, p. 212
Exclusive-OR gate doubles VCM output frequency..IFD, ED 13, p. 98
EXCLUSIVE-OR gates replace choppers in phase-lock loop.....IFD, ED 3, p. 73
Feedback and clamping circuits improve comparator one-shot.....IFD, ED 8, p. 103
For circular polarization, try a bifilar helix.....ART, ED 13, p. 78
Gate your op amp.....ART, ED 11, p. 90
Go/no go circuit gives visual indication of RTL logic level.....IFD, ED 4, p. 88
Go push-pull for magnetic deflection.....ART, ED 2, p. 70
High-frequency VCO uses TTL gates.....IFD, ED 11, p. 112
High-speed zero crossing detector uses tunnel diodes.....IFD, ED 6, p. 214
Improve receiver frequency stability.....ART, ED 2, p. 76
Improved sawtooth generator has grounded reference point.....IFD, ED 4, p. 80
Improved SCR speed control achieves 100% motor regulation.....IFD, ED 2, p. 90
Improved switch-contact-bounce eliminator uses fewer parts.....IFD, ED 1, p. 128
Inexpensive interface works with both DTL and EIA levels.....IFD, ED 2, p. 90
Integrated op-amp pulse circuit has 18-second time constant.....IFD, ED 11, p. 108
Level-shifting circuit uses analog and digital design..IFD, ED 8, p. 107
Liberate your FET amplifier.....ART, ED 11, p. 78
Linear temperature monitor uses silicon diodes as sensor.....IFD, ED 1, p. 124
Linear temperature sensor uses only a single transistor.....IFD, ED 4, p. 86
Low-power Schottky-clamped TTL circuits boast propagation delays of just 3 ns.....PF, ED 10, p. 129
Low-voltage shunt regulator can power tunnel diodes.....IFD, ED 11, p. 110
Modified one-shot provides long delay time.....IFD, ED 9, p. 94
Monolithic circuits provide inexpensive dual regulation.....IFD, ED 11, p. 110
MOS/bipolar memories store up to 4096 bits.....PF, ED 9, p. 101
Need low-voltage dc converter?.....ART, ED 4, p. 66
Need to design a switching regulator?.....ART, ED 1, p. 106
Neon-bulb circuit doubles as pilot light and trouble light.....IFD, ED 1, p. 130
New starting circuit requires little power.....IFD, ED 9, p. 90
Noise generator simulates radar return-signal 'grass'.....IFD, ED 11, p. 114
Noise spikes trigger random-pulse generator....IFD, ED 12, p. 102
Over/under voltage monitor is inexpensive and stable.....IFD, ED 3, p. 75
Perform frequency scaling without rate multipliers..IFD, ED 2, p. 86
Phase-locked loop utilizes current-controlled oscillator.....IFD, ED 10, p. 114
Predict intermodulation distortion..ART, ED 10, p. 76
Presettable up/down counter needs no inhibits or one-shots.....IFD, ED 10, p. 116
Program designs active filters.....ART, ED 6, p. 188
Programmable design gives gating timer line immunity.....IFD, ED 9, p. 90
Pulse stretcher remembers level of narrow spike.....IFD, ED 12, p. 96
Schmitt trigger program uses standard resistor values.....IFD, ED 12, p. 100
Select the right op amp for the job.....ART, ED 13, p. 106
Simple ramp generator uses five components....IFD, ED 5, p. 83
Simple transistor checker boasts speed and versatility.....IFD, ED 12, p. 96
Simple zero crossing detector minimizes power-line RFI.....IFD, ED 5, p. 81
Single transformer provides positive and negative voltages.....IFD, ED 2, p. 86
Single transistor AND gate needs no power supply...IFD, ED 9, p. 92
Solid-state isolation relay has non-polarized terminals.....IFD, ED 7, p. 77
Solve op-amp slew-rate requirements.....ENG DATA, ED 13, p. 82
Speed up the fast Fourier transform.....ART, ED 9, p. 66
Spring Joint Computer Conference 1970.....SR, ED 9, p. C1
Three-transistor circuit functions as a one-shot SCR...IFD, ED 5, p. 81
Transformer temperature found from winding resistance.....IFD, ED 13, p. 94
Two-transistor circuit blocks wrong voltage polarity/level.....IFD, ED 4, p. 90
Use a complementary stage to extend IC output level..IFD, ED 7, p. 75
Use an audible alarm to indicate a blown fuse.....IFD, ED 4, p. 84
Use ECAP to design transistor models.....ART, ED 10, p. 92
Varactor tuning can be tricky.....ART, ED 8, p. 82
Voltage regulator is a current source or sink.....IFD, ED 12, p. 102
Voltage window detector provides logical output.IFD, ED 10, p. 114
Why use current-mode flip-flops?...ART, ED 3, p. 64
Wideband frequency doubler from a single MOS IC.....IFD, ED 1, p. 128
Wiring modification improves voltage variable delay circuit.....IFD, ED 4, p. 82

Communications

Ambulance telemeters information to doctor.....NEWS, ED 3, p. 21
Bell to test waveguide communications system..NEWS, ED 4, p. 21
Boost discriminator performance with a differential capacitor.....IFD, ED 3, p. 71
Breaking the laser communication barriers.....NEWS, ED 4, p. 30
Cable TV: Slumbering electronic giant—A multibillion industry?..SR, ED 8, p. 62
Casinos find the best 'system' is electronics.SR, NEWS, ED 2, p. 24
Check peak fm deviation the easy way.....ENG DATA, ED 5, p. 70
Closed-circuit TV sales boom in big-time racing...NEWS, ED 6, p. 22
Coast-to-coast test for satellite TV..NEWS, ED 2, p. 22
Complete guide to technical papers.....IEEE, ED 6, p. U110
Computer terminal prints four alphabets.....NEWS, ED 7, p. 21
Data processor to cut communications costs...NEWS, ED 7, p. 22

XUM

Electronics scores in sports . . . . . SR, ED 11, p. 36

50% rise asked in satellite circuits . . . . . NEWS, ED 2, p. 37

Giant Swedish antenna to relay telephone calls . . . . . FOREIGN, ED 13, p. 33

Improve receiver frequency stability . . . . . ART, ED 2, p. 76

In data communication, it's LSI . . . . . NEWS, ED 6, p. 24

Intelsat III starts commercial service . . . . . NEWS, ED 4, p. 22

Modular terminal computers talk to any other system . . . . . PF, ED 9, p. C42

NASA's relay satellite faces a wobbly future . . . . . NEWS, ED 4, p. 40

Navy needs telemetry gear in L and S bands . . . . . NEWS, ED 2, p. 22

Navy to computerize its message processing . . NEWS, ED 10, p. 30

New gear improves scuba communications . . . . . NEWS, ED 2, p. 22

Off-line/on-line printers improve copy and cut costs . . . . . PF, ED 9, p. C46

Optical circuits carry laser light . . . . . NEWS, ED 6, p. 22

Portable terminal keeps computer on call . . . . . NEWS, ED 4, p. 36

Solar eclipse to air propagation prediction . . . . . NEWS, ED 5, p. 22

Spring Joint Computer Conference 1970 . . . . . SR, ED 9, p. C1

Stamping out crime by the numbers . . . . . NEWS, ED 8, p. 28

Time marches on—but electronically now . . . . . NEWS, ED 7, p. 25

Varactor tuning can be tricky . . . . . ART, ED 8, p. 82

What role for the FCC in the future of CATV? . . . . . NEWS, ED 7, p. 21

Worldwide network to predict solar EMI . . . . . NEWS, ED 13, p. 34

Components

A/d and d/a signal conditioning modules set new standards in performance and price . . . . . PF, ED 12, p. 111

Alterable read-only core memory uses plug-in fixed-program boards . . . . . PF, ED 8, p. 133

Ambulance telemeters information to doctor . . . . . NEWS, ED 3, p. 21

An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 6, p. 178

An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 7, p. 50

An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 8, p. 76

An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 9, p. 72

An Electronic Design practical guide for synchro-to-digital converters . . . . . ART, ED 10, p. 98

Avoid the pitfalls of power-supply connections . . ART, ED 4, p. D10

Beam-lead-chip TTL ICs are packaged units too . . . . PF, ED 13, p. 137

Boost discriminator performance with a differential capacitor . . . . . IFD, ED 3, p. 71

Broadband low-cost rf switch boasts tiny size of 0.025 in.^{3} . . . . . PF, ED 6, p. 234

Chart speeds the design of single-layer air-core coils . . . . . IFD, ED 6, p. 216

Coin-sized electrochemical storage device gives 50-F capacitance with 0.5-V rating . . . . PF, ED 6, p. 227

Complete guide to technical papers . . . . . IEEE, ED 6, p. U110

Computer terminal uses photochromic CRT . . . . . NEWS, ED 9, p. 36

Contactless magnetic counter has high accuracy . . . . . NEWS, ED 11, p. 28

Device is an adaptive filter or transformer . . . . . NEWS, ED 4, p. 34

Digital-tape sensor requires no adjustments . . . . IFD, ED 10, p. 112

Diode protects power supply from short circuits . . IFD, ED 8, p. 105

DTL circuit triggers multivibrator and insures starting . IFD, ED 8, p. 105

Dynamic 20-bit shift register is 15-MHz n-channel MOS IC . . . . . PF, ED 3, p. 88

Economy 0.1% multiplier spans 100-kHz bandwidth . . . . . PF, ED 6, p. U134

Electromagnetic interference worry you? . . . . . ART, ED 6, p. 199

Electron beam transfers color video tape to film . . NEWS, ED 9, p. 22

Electronically tuned notch filter uses FET as a resistor . . . . . IFD, ED 6, p. 212

Electronics scores in sports . . . . . SR, ED 11, p. 36

Etching improves multilayer board soldering . . . . . IFD, ED 7, p. 77

EXCLUSIVE-OR gates replace choppers in phase-lock loop . . . . . IFD, ED 3, p. 73

F-15's missile sensor tests are under way . . . . . NEWS, ED 5, p. 21

Fluidics still striving for wider acceptance . . . . NEWS, ED 1, p. 21

Fluidics: Why not try it, specialists suggest . . . . . NEWS, ED, 2, p. 32

Four-GHz transistors retail for only $14 . . . . . PF, ED 13, p. 130

Gate turn-off SCRs switch 5 A in 2μs . . . . . PF, ED 1, p. 145

Half-dollar-sized disc holds up to 50 farads . . . . . NEWS, ED 6, p. 21

Hearing aid uses tiny 1.2-V op amp . . . . . NEWS, ED 5, p. 31

High-speed zero crossing detector uses tunnel diodes . . . . . IFD, ED 6, p. 214

How to cut semiconductor memory costs . . . . . NEWS, ED 4, p. 32

Hybrid transistor-can vhf/uhf amplifiers gain 14 dB minimum from 5 to 500 MHz . . PF, ED 13, p. 129

Impatts continue their trip from lab to field . . . . . NEWS, ED 6, p. 25

Improved SCR speed control achieves 100% motor regulation . . . . . IFD, ED 2, p. 90

Inexpensive interface works with both DTL and EIA levels . . . . . IFD, ED 2, p. 90

Liberate your FET amplifier . . . . . ART, ED 11, p. 78

Linear temperature monitor uses silicon diodes as sensor . . . . . IFD, ED 1, p. 124

Linear temperature sensor uses only a single transistor . . . . . IFD, ED 4, p. 86

Low-cost TTL MSI IC pair enhance arithmetic logic . PF, ED 7, p. 102

Low-cost 50-MHz counter doubles as a seven-digit DVM . . . . . PF, ED 2, p. 106

Low-cost 100-μW op amp holds bias to 3 nA . . . . . PF, ED 10, p. 133

Low-power Schottky-clamped TTL circuits boast propagation delays of just 3 ns . . . . . PF, ED 10, p. 129

Make sure you pick the right power supply . . . . . ART, ED 4, p. D22

Mini-antenna—but what a maxi performance! . . . . NEWS, ED 8, p. 25

Miniature storage tube for $500 can hold an image for two weeks . . . . . PF, ED 2, p. 101

Modular a/d and d/a converters boost performance, drop prices . . . . . PF, ED 6, p. U132

Modular 15-bit d/a converters set state-of-art specs . PF, ED 3, p. 85

Modular $195 a/d converter handles 10 bits in 30 μs . . . . . PF, ED 5, p. 102

Monolithic LED numeric competes with nixie prices . . . . . PF, ED 7, p. 110

Monolithic readout challenges Nixies . . . . . NEWS, ED 6, p. 22

Neon-bulb circuit doubles as pilot light and trouble light . . . . . IFD, ED 1, p. 130

New gas engines offer computer standby power . NEWS, ED 6, p. 22

New isolator boosts solid-state power . . . . . NEWS, ED 13, p. 25

New progress in ferroelectric ceramics . . . . NEWS, ED 12, p. 30

Nonexplosive fuze releases mechanical energy . . . . NEWS, ED 8, p. 26

Optical encoder with remote reflective disc controls speed digitally without adding mass . . . . . PF, ED 9, p. 97

Plug-in IC logic-card system permits customized designs . . . . . PF, ED 6, p. U138

Power tubes making a strong comeback . . . . . IEEE, ED 6, p. U97

Read-only 512-bit memory programs electronically . . PF, ED 10, p. 130

Sensors would inflate car-crash cushions . . . . . NEWS, ED 12, p. 22

Simple ramp generator uses five components . . . . IFD, ED 5, p. 83

Simple technique removes multilead components from PCs . . . IFD, ED 1, p. 130
Single transformer provides positive and negative voltages . . . IFD, ED 2, p. 86
Single transistor AND gate needs no power supply . . . IFD, ED 9, p. 92
Solid-state isolation relay has nonpolarized terminals . . . IFD, ED 7, p. 77
Spring Joint Computer Conference 1970 . . . SR, ED 9, p. C1
Step up power-supply efficiency . . . ART, ED 5, p. 66
Symmetrical power supply is adjusted with only one control . . . IFD, ED 6, p. 210
TTL quad flip-flop with three logic states eliminates need for OR gates on output . . . PF, ED 7, p. 101
The 1971 watch; No hands, no moving parts . . . NEWS, ED 11, p. 30
Three-transistor circuit functions as a one-shot SCR . . IFD, ED 5, p. 81
Time marches on—but electronically now . . . NEWS, ED 7, p. 25
Tiny four-bit converter is fast thin-film hybrid . . . PF, ED 1, p. 146
Transistor chips for 60¢ dissipate up to 117 W . . . PF, ED 12, p. 116
Trimmed chopperless op amp minimizes drift to 0.25 μV/°C . . . PF, ED 10, p. 136
Use ECAP to design transistor models . . . ART, ED 10, p. 92
Use piezoelectric ceramics . . . ART, ED 5, p. 60
Varactor diode is the key to a simple frequency divider . IFD, ED 4, p. 88
Wideband frequency doubler from a single MOS IC . . IFD, ED 1, p. 128

Computer-Aided Design

Active filter design uses BASIC language . . . IFD, ED 5, p. 83
BASIC program designs bias circuits . . . IFD, ED 13, p. 92
Complete guide to technical papers . . . IEEE, ED 6, p. U110
Design filters in minutes . . . ART, ED 11, p. 86
Design MOS circuits on a computer . . . ART, ED 13, p. 68
Make tables with a time-shared computer . . . IFD, ED 4, p. 88
Program designs active filters . . . ART, ED 6, p. 188
Program determines worst-case part values . . . IFD, ED 7, p. 81
Programmable design gives gating timer line immunity . . . IFD, ED 9, p. 90
Schmitt trigger program uses standard resistor values . . . IFD, ED 12, p. 100
Speed up the fast Fourier transform . . . ART, ED 9, p. 66
Spring Joint Computer Conference 1970 . . . SR, ED 9, p. C1
Use ECAP to design transistor models . . . ART, ED 10, p. 92

Computers & Data Processing

A/d and d/a signal conditioning modules set new standards in performance and price . . . PF, ED 12, p. 111
Alterable read-only core memory uses plug-in fixed-program boards . . . PF, ED 8, p. 133
Automation revolution sweeps Europe . . . NEWS, ED 12, p. 24
British urged to merge computer software firms . . . NEWS, ED 11, p. 22
Business-machine trade soars to new heights . . FOREIGN, ED 13, p. 33
Canon and TI develop LSI pocket calculator . . . NEWS, ED 11, p. 22
Complete guide to technical papers . . . IEEE, ED 6, p. U110
Computer functions as ship's doctor . . . NEWS, ED 1, p. 22
Computer terminal prints four alphabets . . . NEWS, ED 7, p. 21
Computer terminal uses photochromic CRT . . . NEWS, ED 9, p. 36
Computers can spot offshore oil leaks . . . NEWS, ED 4, p. 22
Computers to sort mail at 210 post offices . . . NEWS, ED 9, p. 21
Contactless magnetic counter has high accuracy . . . NEWS, ED 11, p. 28
Content addressable memories match input to stored data . . . PF, ED 11, p. 117
Data processor to cut communications costs . . . NEWS, ED 7, p. 22
Data-system activator has hold feature . . . IFD, ED 13, p. 96
Digital computer with 16-bit capacity boasts basic cycle time of 100 ns . . . PF, ED 9, p. C36
Digital Equipment adds 16-bit minicomputer . . . NEWS, ED 3, p. 22
Digital system locates vehicles in seconds . . . NEWS, ED 3, p. 22
Digital-tape sensor requires no adjustments . . . IFD, ED 10, p. 112
Display converts for radar or computer use . . . NEWS, ED 13, p. 28
Electronics scores in sports . . . SR, ED 11, p. 36
From machine tools to minicomputers . . . NEWS, ED 4, p. 21
Gigabit technology picking up speed . . . IEEE, ED 6, p. U86
High-speed plated-wire read-only memories can electronically alter stored-program data . . . PF, ED 5, p. 95
Lasers show promise as computer memories . . . NEWS, ED 12, p. 22
Memory devices to be explored at conference . . . NEWS, ED 5, p. 22
Minicomputer to do skyscraper chores . . . NEWS, ED 10, p. 22
Mini-machines and mini-firms marked this year's SJCC . . . NEWS, ED 11, p. 21
Modular terminal computers talk to any other system . . . PF, ED 9, p. C42
MOS/bipolar memories store up to 4096 bits . . . PF, ED 9, p. 101
Navy to computerize its message processing . . NEWS, ED 10, p. 30
New computer firm pushes modular concept . . . NEWS, ED 10, p. 22
New field-programmable ROM slated for debut . . . NEWS, ED 13, p. 22
New gas engines offer computer standby power . NEWS, ED 6, p. 22
Novel storage terminal slashes graphics costs . . PF, ED 9, p. C51
Off-line/on-line printers improve copy and cut costs . . . PF, ED 9, p. C46
Portable terminal keeps computer on call . . . NEWS, ED 4, p. 36
'Second-sourcing' starts in minicomputer market . . NEWS, ED 7, p. 21
$71-million in computers ordered by Government . . NEWS, ED 9, p. 21
Shakeout is rattling time-sharing business . . . NEWS, ED 3, p. 21
Solid-state memories cost less than 2¢ per bit . . . PF, ED 6, p. 238
Speed up the fast Fourier transform . . . ART, ED 9, p. 66
Spring Joint Computer Conference 1970 . . . SR, ED 9, p. C1
Stamping out crime by the numbers . . . NEWS, ED 8, p. 28
System design means trade-offs . . . ART, ED 7, p. 60
The computer and its growing pains . . . SR, ED 1, p. 80
The minicomputer: machine with an endless future . . . SR, ED 9, p. C6
3-way struggle looming for No. 2 computer spot . . . NEWS, ED 12, p. 21
2 new minicomputers to be shown at SJCC . . . NEWS, ED 9, p. 22
Urgently wanted: A data terminal . . . SR, ED 1, p. 90
Utilities discover the power of computers . . . NEWS, ED 5, p. 30
Wanted: Memory for sledding at Mach 7 . . . NEWS, ED 6, p. 41
World stock quotations offered in real time . . . NEWS, ED 13, p. 22

Consumer Electronics

All-IC consumer products edge a little closer . . . NEWS, ED 6, p. 26
Cable TV: Slumbering electronic giant—A multibillion industry? . . . SR, ED 8, p. 62
Canon and TI develop LSI pocket calculator . . . NEWS, ED 11, p. 22
'Cities are the growth industry of the future' . . . IEEE, ED 6, p. U89
Coast-to-coast test for satellite TV . . NEWS, ED 2, p. 22
Desk-top calculators close the gap . . . ART, ED 1, p. 114
Electronics scores in sports . . . SR, ED 11, p. 36

XUM

Expansion plan cheers cable-TV industry . . . . NEWS, ED 12, p. 22
FCC official warns of dangers of EMI . . . . NEWS, ED 8, p. 22
For the consumer it's solid state . . . . SR, ED 1, p. 76
Hearing aid uses tiny 1.2-V op amp . . . . NEWS, ED 5, p. 31
New gear improves scuba communications . . . . NEWS, ED 2, p. 22
Improved SCR speed control achieves 100% motor regulation . . . . IFD, ED 2, p. 90
Reserve train seats with vending machine . . . . NEWS, ED 1, p. 22
Sensors would inflate car-crash cushions . . . . NEWS, ED 12, p. 22
Soviet puts lasers in telephone links . . . . NEWS, ED 8, p. 21
Spring Joint Computer Conference 1970 . . . . SR, ED 9, p. C1
The 1971 watch: No hands, no moving parts . . . . NEWS, ED 11, p. 30
Time marches on—but electronically now . . . . NEWS, ED 7, p. 25
What role for the FCC in the future of CATV? . . . . NEWS, ED 7, p. 21

Displays

Choose magnetic deflection . . . . ART, ED 9, p. 80
Closed-circuit TV sales boom in big-time racing . . . NEWS, ED 6, p. 22
Desktop $500 data display is self-contained terminal . . . . PF, ED 9, p. C41
Display conference sees need for more color . . NEWS, ED 13, p. 21
Display converts for radar or computer use . . . NEWS, ED 13, p. 28
Electron beam transfers color video tape to film . . NEWS, ED 9, p. 22
Electronics scores in sports . . . . SR, ED 11, p. 36
Giant C-5A's instrumentation is readied for tests . . . . NEWS, ED 3, p. 26
Go/no circuit gives visual indication of RTL logic level . IFD, ED 4, p. 88
Go push-pull for magnetic deflection . . . . ART, ED 2, p. 70
Hexidecimal display uses MSI package to drive Nixie readout . . . . IFD, ED 2, p. 88
Miniature storage tube for $500 can hold an image for two weeks . . . . PF, ED 2, p. 101
Monolithic LED numeric competes with nixie prices . PF, ED 7, p. 110
Monolithic readout challenges Nixies . . . . NEWS, ED 6, p. 22
New terminal displays radar, computer data . . NEWS, ED 12, p. 22
Novel storage terminal slashes graphics costs . . SR, ED 9, p. C51
Off-line/on-line printers improve copy and cut costs . . PF, ED 9, p. C46
Spring Joint Computer Conference 1970 . . . . SR, ED 9, p. C1
The 1971 watch: No hands, no moving parts . . . NEWS, ED 11, p. 30
Time marches on—but electronically now . . . . NEWS, ED 7, p. 25
World stock quotations offered in real time . . . NEWS, ED 13, p. 22

General Industry

A new show helps launch 'the spectacular 70s' . . IEEE, ED 6, p. U85
As goes the economy; so goes IEEE show . . . . NEWS, ED 8, p. 22
Avoid the pitfalls of power-supply connections . . . ART, ED 4, p. D10
Belgian manufacturers set up New York office . . . NEWS, ED 4, p. 22
Big show with an eye for the tiny . . . . NEWS, ED 10, p. 25
Business-machine trade soars to new heights . . FOREIGN, ED 13, p. 33
By 1980, you may need a doctorate . . . . SR, ED 1, p. 94
'Cities are the growth industry of the future' . . . . IEEE, ED 6, p. U89
Complete guide to technical papers . . . . IEEE, ED 6, p. U110
Demand for engineers declined again in 1969 . . . . NEWS, ED 6, p. 22
Electronics—it follows you everywhere nowadays . . . . EDIT, ED 4, p. 55
Electronics scores in sports . . . . SR, ED 11, p. 36
Engineers' problems are also industry's problems . EDIT, ED 8, p. 61
For Sales/EE interface: Sell—don't tell . . . . ED 4, ART, p. 76
Get to know your local SBA agent . . . . ART, ED 10, p. 106
IEEE chief sees industry facing tough pull in 70s . . . . NEWS, ED 12, p. 21
Israelis double electronics output . . . . NEWS, ED 9, p. 21
Item 807: A boon—or bust for electronics? . . . . NEWS, ED 9, p. 24
Japan's electronic sales rocket to new heights . . . . IEEE, SR, ED 6, p. U162
Job market dark for June EE grads: . . . . NEWS, ED 4, p. 22
Made in Japan . . . . IEEE, SR, ED 6, p. U161
Money isn't everything to a Japanese engineer . IEEE, SR, ED 6, p. U174
NASA's job picture—a continuing decline . . . . NEWS, ED 10, p. 22
Needed: a quality design for living . . . . ART, ED 12, p. 90
Private R&D supported . . . . NEWS, ED 3, p. 22
'71 budget will separate the men from the boys . . EDIT, ED 6, p. 63
Simple technique removes multilead components from PCs . . . . IFD, ED 1, p. 130
'69 electronics profits up, sales down survey shows . . . . NEWS, ED 13, p. 21
Smallest electronics advance in years . . . . NEWS, ED 1, p. 25
Spring Joint Computer Conference 1970 . . . . SR, ED 9, p. C1
Technology in the 70's . . . . SR, ED 1, p. 68
Technology in the Seventies: it's how it's used that counts . . . . EDIT, ED 1, p. 51
Technology: Present and future . . . . IEEE, ED 6, p. U86
That 'dream' job might be a nightmare! . . . . ART, ED 6, p. 204
The automation revolution sweeps Europe . . . . NEWS, ED 12, p. 24
$200.8-billion U.S. budget shuffles priorities . . . . ED 5, NEWS, p. 24
U.S. Budget for fiscal 1971; A mixed anti-inflation bag . . . . NEWS, ED 4, p. 21
U.S. Commerce Dept. sponsors show in Japan . . . . NEWS, ED 10, p. 21
U.S. electronics may be hit by European trade agreement . . . . NEWS, ED 6, p. 21
U. S. sales at Mesucora exceed $100,000 mark . . . . NEWS, ED 13, p. 22
U.S. technology stars at 20-nation Paris show . . . NEWS, ED 9, p. 21
Urban engineering: Help for U.S. cities . . . . SR, ED 1, p. 71
Workshops in the sky, then factories . . . . NEWS, ED 1, p. 30

Industrial Electronics

A/d and d/a signal conditioning modules set new standards in performance and price . . . . PF, ED 12, p. 111
An Electronic Design practical guide for synchro-to-digital converters . . . . ART, ED 6, p. 178
An Electronic Design practical guide for synchro-to-digital converters . . . . ART, ED 7, p. 50
An Electronic Design practical guide for synchro-to-digital converters . . . . ART, ED 8, p. 76
An Electronic Design practical guide for synchro-to-digital converters . . . . ART, ED 9, p. 72
An Electronic Design practical guide for synchro-to-digital converters . . . . ART, ED 10, p. 98
Any code goes with IC decoder/drivers . . . . ART, ED 13, p. 74
Automatic caller reads meters by telephones . . . NEWS, ED 8, p. 22
Automation revolution sweeps Europe . . . . NEWS, ED 12, p. 24
Cable TV: Slumbering electronic giant—A multibillion industry? . . . . SR, ED 8, p. 62
Casinos find the best 'system' is electronics . . . . SR, NEWS, ED 2, p. 24
'Cities are the growth industry of the future' . . . IEEE, ED 6, p. U89
Coast-to-coast test for satellite TV . . . . NEWS, ED 2, p. 22
Complete guide to technical papers . . . . IEEE, ED 6, p. U110
Computers to sort mail at 210 post offices . . . . NEWS, ED 9, p. 21

Computing $750 counter measures 1 Hz to 1 MHz..PF, ED 4, p. 98
Digital system locates vehicles in seconds.....NEWS, ED 3, p. 22
Digital-tape sensor requires no adjustments....IFD, ED 10, p. 112
Electron beam transfers color video tape to film..NEWS, ED 9, p. 22
Electronics makes ski slopes safer.....NEWS, ED 1, p. 21
Electronics scores in sports.....SR, ED 11, p. 36
Environment pollution calls for a team cure..IEEE, ED 6, p. U100
Expansion plan cheers cable-TV industry.....NEWS, ED 12, p. 22
Fast image analyzer for materials research.....NEWS, ED 1, p. 22
FCC urges control of 'electronic smog'.....NEWS, ED 1, p. 36
Fluidics still striving for wider acceptance....NEWS, ED 1, p. 21
Fluidics: Why not try it, specialists suggest.....NEWS, ED 2, p. 32
Improved SCR speed control achieves 100% motor regulation.....IFD, ED 2, p. 90
Industry can help solve postal chaos.....EDIT, ED 9, p. 63
Laser makes air visible to aircraft designers...NEWS, ED 11, p. 32
Linear sweep generator uses zener diode.....IFD, ED 12, p. 98
Low-cost tape copying developed in Japan.....NEWS, ED 9, p. 22
Minicomputer to do skyscraper chores.....NEWS, ED 10, p. 22
MIT Alumni Center attacks urban problems....NEWS, ED 4, p. 22
Monitor keeps tab on noisy vehicles.....NEWS, ED 1, p. 34
New electron microscope can "see" heavy atoms.NEWS, ED 12, p. 21
New holographic system foils credit-card frauds..NEWS, ED 13, p. 21
New radar will solve mysteries of storms.....NEWS, ED 4, p. 31
Pollution control needs more technical push.....NEWS, ED 8, p. 22
Process squeezes out wire like toothpaste.....NEWS, ED 11, p. 26
Simple technique removes multihead components from PCs.....IFD, ED 1, p. 130
Soviet puts lasers in telephone links.....NEWS, ED 8, p. 21
Spring Joint Computer Conference 1970.....SR, ED 9, p. C1
Stamping out crime by the numbers.....NEWS, ED 8, p. 28
Time marches on—but electronically now.....NEWS, ED 7, p. 25
Tug operation made easy.....NEWS, ED 8, p. 26
U. S. Center in Frankfurt to show clean-air devices.....FOREIGN, ED 13, p. 33
U. S. Post Office buys Japanese mail handler.....FOREIGN, ED 13, p. 33
What role for the FCC in the future of CATV?....NEWS, ED 7, p. 21
World stock quotations offered in real time...NEWS, ED 13, p. 22

Management

A labor guild for engineers? The idea has possibilities.....EDIT, ED 5, p. 45
Anxious about the sale of your design?.....ART, ED 1, p. 118
Appraisal programs can be effective.....ART, ED 2, p. 80
Are you your own worst enemy?.....EDIT, ED 7, p. 49
Be your own boss this year—you and your job will benefit.....EDIT, ED 2, p. 49
Casinos find the best 'system' is electronics.....SR, NEWS, ED 2, p. 24
'Cities are the growth industry of the future'.....IEEE, ED 6, p. U89
Complete guide to technical papers.....IEEE, ED 6, p. U110
Curing engine failures BEFORE they occur.....NEWS, ED 7, p. 30
Electronic network proposed to monitor pollution..NEWS, ED 5, p. 21
Engineers' problems are also industry's problems.EDIT, ED 8, p. 61
Engineers want more challenges.....ART, ED 11, p. 96
Environment pollution calls for a team cure..IEEE, ED 6, p. U100
Explore the 'now' meaning of innovation.....ART, ED 9, p. 84
FCC official warns of dangers of EMI.....NEWS, ED 8, p. 22
For Sales/EE interface: Sell—don't tell.....ED 4, ART, p. 76
Get to know your local SBA agent..ART, ED 10, p. 106
Job market dark for June EE grads.....NEWS, ED 4, p. 22
Management is in metamorphosis..ART, ED 7, p. 70
Microwaves may reduce sewage-treatment cost.....NEWS, ED 10, p. 22
Minicomputer to do skyscraper chores.....NEWS, ED 10, p. 22
MIT Alumni Center attacks urban problems....NEWS, ED 4, p. 22
Money isn't everything to a Japanese engineer.....IEEE, SR, ED 6, p. U174
Seminannual index of articles.....ED 4, p. 92
Spring Joint Computer Conference 1970.....SR, ED 9, p. C1
Sure, it's a down year, but what are you going to do about it?.....EDIT, ED 13, p. 67
System design means trade-offs...ART, ED 7, p. 60
That 'dream' job might be a nightmare!.....ART, ED 6, p. 204
There's no magic to managing Intelsat IV.....ART, ED 5, p. 72
Think sales engineering is your thing?.....ART, ED 13, p. 86
Why not give your Congressman some lessons in engineering?.....EDIT, ED 12, p. 69
Wired for the 'electric' generation?.....ART, ED 8, p. 94

Materials & Packaging

Complete guide to technical articles.....IEEE, ED 6, p. U110
Computer terminal uses photochromic CRT..NEWS, ED 9, p. 36
Electronic system stops corrosion of metals.....NEWS, ED 13, p. 32
Etching improves multilayer board soldering.....IFD, ED 7, p. 77
Monolithic LED numeric competes with nixie prices.....PF, ED 7, p. 110
Multi-layer IC wiring structure packs 4 chips in standard DIP.....PF, ED 4, p. 116
New ceramic promises to be useful in devices..NEWS, ED 11, p. 21
New computer firm pushes modular concept....NEWS, ED 10, p. 22
New devices developed at Bell Labs.....NEWS, ED 9, p. 37
Simple technique removes multilead components from PCs.....IFD, ED 1, p. 130
Spring Joint Computer Conference 1970.....SR, ED 9, p. C1

Medical Electronics

Automated heart care shown in N.J. hospital....NEWS, ED 10, p. 22
Complete guide to technical papers.....IEEE, ED 6, p. U110
Designers still grope for efficient 'limbs'.....IEEE, ED 6, p. U92
Electronics tunes in on muscle fatigue.....NEWS, ED 7, p. 34
Hospital data system designed by an MD.....NEWS, ED 9, p. 30
Medical electronics to be legislated?.....NEWS, ED 5, p. 21
NASA scientist offers new cancer theory.....NEWS, ED 8, p. 21
Rx for progress in medical electronics: Communicate!.....NEWS, ED 6, p. 30
Ultrasound used to check for heart disease.....NEWS, ED 6, p. 22
Where EE and MD link up to prolong life.....SR, ED 4, p. 24

Microelectronics

A changing world with microcircuits.....SR, ED 1, p. 84
All-IC consumer products edge a little closer..NEWS, ED 6, p. 26
Any code goes with IC decoder/drivers.....ART, ED 13, p. 74
Beam-lead-chip TTL ICs are packaged units too.....PF, ED 13, p. 137
Boost your DTL efficiency with wired-OR.....ART, ED 8, p. 89
Can you build a system with off-the-

XUM

shelf LSI?.....SR, ED 5, p. 46
Clock and control with TTL.....ART, ED 10, p. 82
Commercial-price ICs are 100% MIL-tested....PF, ED 9, p. 103
Complete guide to technical papers.....IEEE, ED 6, p. U110
Costs of ICs reduced by new BTL technique....NEWS, ED 5, p. 22
Design MOS circuits on a computer.....ART, ED 13, p. 68
DTL circuit triggers multivibrator and insures starting.....IFD, ED 8, p. 105
Dynamic 20-bit shift register is 15-MHz n-channel MOS IC.....PF, ED 3, p. 88
Electronics scores in sports.....SR, ED 11, p. 36
EXCLUSIVE-OR gates replace choppers in phase-lock loop.....IFD, ED 3, p. 73
Extend standard cell design to bipolars.....NEWS, ED 6, p. 42
Fairchild looks into its IC future...NEWS, ED 1, p. 21
Find the absolute value of bipolar pulses.....IFD, ED 4, p. 84
For the consumer it's solid state...SR, ED 1, p. 76
Frequency-shift oscillator uses DTL circuits throughout.....IFD, ED 3, p. 77
Gate your op amp.....ART, ED 11, p. 90
Go/no go circuit gives visual indication of RTL logic level.....IFD, ED 4, p. 88
Hearing aid uses tiny 1.2-V op amp.....NEWS, ED 5, p. 31
Hexidecimal display uses MSI package to drive Nixie readout.....IFD, ED 2, p. 88
High-frequency VCO uses TTL gates.....IFD, ED 11, p. 112
His IC brainchild is no baby any more.....EDIT, ED 3, p. 43
How to cut semiconductor memory costs.....NEWS, ED 4, p. 32
Huge market growth forecast for British ICs...NEWS, ED 6, p. 32
Hybrid transistor-can vhf/uhf amplifiers gain 14 dB minimum from 5 to 500 MHz..PF, ED 13, p. 129
IC complexity due to double yearly..IEEE, ED 6, p. U93
ICs play a heavy role in Japanese success.IEEE, SR, ED 6, p. U164
Improved current source uses linear IC as a design element.....IFD, ED 5, p. 79
In data communication, it's LSI....NEWS, ED 6, p. 24
Integrated op-amp pulse circuit has 18-second time constant.....IFD, ED 11, p. 108
Ion-implanted 64-bit register works at 20-MHz clock rates.....PF, ED 1, p. 144
Inexpensive interface works with both DTL and EIA levels.....IFD, ED 2, p. 90
LSI poses dilemma for systems designers.....SR, ED 3, p. 44
Laser beam draws quick and clean patterns for ICs.....NEWS, ED 10, p. 36
Low-cost TTL MSI IC pair enhance arithmetic logic.PF, ED 7, p. 102
Low-power Schottky-clamped TTL circuits boast propagation delays of just 3 ns...PF, ED 10, p. 129
Major advances predicted for thin-film ICs....NEWS, ED 12, p. 36
Monolithic circuits provide inexpensive dual regulation.....IFD, ED 11, p. 110
Monolithic LED numeric competes with nixie prices.....PF, ED 7, p. 110
Monolithic readout challenges Nixies.....NEWS, ED 6, p. 22
MOS/bipolar memories store up to 4096 bits.....PF, ED 9, p. 101
Motorola optimistic about MOS and ECL.....NEWS, ED 11, p. 22
Cards A1 to T48 6-22-70
Multi-layer IC wiring structure packs 4 chips in standard DIP.....PF, ED 4, p. 116
New devices developed at Bell Labs.....NEWS, ED 9, p. 37
New field-programmable ROM slated for debut...NEWS, ED 13, p. 22
Plug-in IC logic-card system permits customized designs.....PF, ED 6, p. U138
Read-only 512-bit memory programs electronically..PF, ED 10, p. 130
S-band IC flatpack amplifiers can be soldered together.....PF, ED 4, p. 108
Solid-state memories cost less than 2¢ per bit....PF, ED 6, p. 238
Spring Joint Computer Conference 1970.....SR, ED 9, p. C1
The 1971 watch: No hands, no moving parts...NEWS, ED 11, p. 30
Thick-film circuits find increasing uses.....NEWS, ED 3, p. 21
TI predicts worldwide boom in semiconductors..NEWS, ED 10, p. 21
Tiny four-bit converter is fast thin-film hybrid.....PF, ED 1, p. 146
TTL quad flip-flop with three logic states eliminates need for OR gates on output.....PF, ED 7, p. 101
Use a complementary stage to extend IC output level.....IFD, ED 7, p. 75

Microwaves & Lasers

Antenna design aid rises in the desert.....NEWS, ED 7, p. 32
Army favors beam scan for helicopter lander...NEWS, ED 7, p. 22
Bell to test waveguide communications system—NEWS, ED 4, p. 21
Breaking the laser communication barriers.....NEWS, ED 4, p. 30
Broadband low-cost rf switch boasts tiny size of 0.025 in.^{3}.....PF, ED 6, p. 234
Cable TV: Slumbering electronic giant—A multibillion industry?..SR, ED 8, p. 62
Check peak fm deviation the easy way.....ENG DATA, ED 5, p. 70
Closed-circuit TV sales boom in big-time racing...NEWS, ED 6, p. 22
Designing with microstrip is easy..ART, ED 1, p. 100
Display converts for radar or computer use..NEWS, ED 13, p. 28
Dual-channel i-f strip tracks without gain matching..IFD, ED 13, p. 94
Electron beam transfers color video tape to film..NEWS, ED 9, p. 22
Electronics scores in sports.....SR, ED 11, p. 36
Elliptic-filter design advances in two areas.....NEWS, ED 13, p. 26
FCC official warns of dangers of EMI.....NEWS, ED 8, p. 22
For circular polarization, try a bifilar helix.....ART, ED 13, p. 78
Giant Swedish antenna to relay telephone calls.....FOREIGN, ED, 13, p. 33
Impatts continue their trip from lab to field.....NEWS, ED 6, p. 25
Improve receiver frequency stability.....ART, ED 2, p. 76
Invisible, corner-turning IR detects thieves....NEWS, ED 11, p. 25
It's time to consider CW chemical lasers.....NEWS, ED 9, p. 28
Laser beam draws quick and clean patterns for ICs.....NEWS, ED 10, p. 36
Laser makes air visible to aircraft designers...NEWS, ED 11, p. 32
Laser or millimeter space communications?....NEWS, ED 10, p. 34
Laser radar to pinpoint details of moon's surface.....NEWS, ED 11, p. 22
Lasers show promise as computer memories..NEWS, ED 12, p. 22
Microwaves may reduce sewage-treatment cost.....NEWS, ED 10, p. 22
Mini-antenna—but what a maxi performance!...NEWS, ED 8, p. 25
NASA's relay satellite faces a wobbly future....NEWS, ED 4, p. 40
Navy develops radar for shipboard guns.....NEWS, ED 5, p. 22
Navy needs telemetry gear in L and S bands.....NEWS, ED 2, p. 22
New-generation radar goes to White Sands.....NEWS, ED 3, p. 22
New holographic system foils credit-card frauds..NEWS, ED 13, p. 21
New isolator boosts solid-state power.....NEWS, ED 13, p. 25
New magnetrons offer bargain coherent radar..NEWS, ED 2, p. 21
New radar will solve mysteries of storms.....NEWS, ED 4, p. 31
Noise generator simulates radar return-signal 'grass'.....IFD, ED 11, p. 114

Optical circuits carry laser light . . . NEWS, ED 6, p. 22
Phased arrays: They're great, but . . . NEWS, ED 6, p. 36
Pilots ask FAA for proximity warner —now . . . . . NEWS, ED 10, p. 32
Return-beam vidicon proves versatile . . . NEWS, ED 6, p. 21
S-band IC flatpack amplifiers can be soldered together . . . PF, ED 4, p. 108
Satellites may get power from laser on the grounds . . . NEWS, ED 12, p. 33
Small microwave relays are ready for Air Force . . . . NEWS, ED 7, p. 22
Soviet puts lasers in telephone links . . . NEWS, ED 8, p. 21
Spring Joint Computer Conference 1970 . . . . . SR, ED 9, C1
Varactor tuning can be tricky . . . . . ART, ED 8, p. 82
What role for the FCC in the future of CATV? . . . . NEWS, ED 7, p. 21

Military & Aerospace

ABM expansion may lose House committee support . . . NEWS, ED 8, p. 21
AF air-control network almost ready to travel . . . . NEWS, ED 13, p. 22
AF stretches work on navigation satellite . . . . . NEWS, ED 3, p. 25
Air Force ends study of UFOs . . . . . NEWS, ED 1, p. 22
Airfield in the ocean . . . Floating electronic isle . . . SR, ED 2, p. 58
An anticollision system for all planes . . . NEWS, ED 13, p. 30
Antenna design aid rises in the desert . . . . . NEWS, ED 7, p. 32

Find the absolute value of bipolar pulses . . . . . IFD, ED 4, p. 84
For the consumer it's solid state . . . SR, ED 1, p. 76
Gate turn-off SCRs switch 5 A in 2 μs . . . . . PF, ED 1, p. 145
High-speed zero crossing detector uses tunnel diodes . . . IFD, ED 6, p. 214
Improved SCR speed control achieves 100% motor regulation . . . IFD, ED 2, p. 90
Liberate your FET amplifier . . . ART, ED 11, p. 78
Linear temperature sensor uses only a single transistor . . . IFD, ED 4, p. 86
Cards A1 to T48 6-22-70
Major advances predicted for thin-film ICs . . . . NEWS, ED 12, p. 36
Monolithic readout challenges Nixies . . . NEWS, ED 6, p. 22
Motorola optimistic about MOS and ECL . . . . . NEWS, ED 11, p. 22
New devices developed at Bell Labs . . . NEWS, ED 9, p. 37
New field-programmable ROM slated for debut . . . . NEWS, ED 13, p. 22
Read-only 512-bit memory programs electronically . . PF, ED 10, p. 130
Simple transistor checker boasts speed and versatility . . . IFD, ED 12, p. 96
Solid-state memories cost less than 2¢ per bit . . . . . PF, ED 6, p. 238
Spring Joint Computer Conference 1970 . . . . . SR, ED 9, p. C1
TI predicts worldwide boom in semiconductors . . NEWS, ED 10, p. 21
Transistor chips for 60¢ dissipate up to 117 W . . PF, ED 12, p. 116
Two-transistor circuit blocks wrong voltage polarity/level . . . IFD, ED 4, p. 90
Varactor diode is the key to a simple frequency divider . . . IFD, ED 4, p. 88
Why use current-mode flip-flops? . . . ART, ED 3, p. 64

Systems

A new era beckons systems developers . . . . . IEEE, ED 6, p. U87
AF air-control network almost ready to travel . . . . NEWS, ED 13, p. 22
An anticollision system for all planes . . . NEWS, ED 13, p. 30
Anemometer aids remote weather stations . . . . . NEWS, ED 3, p. 30
Bell to test waveguide communications system . . NEWS, ED 4, p. 21
Casinos find the best 'system' is electronics . . . SR, NEWS, ED 2, p. 24
Complete guide to technical papers . . . IEEE, ED 6, p. U110

XUM

Digital system locates vehicles in seconds....NEWS, ED 3, p. 22
Electronics scores in sports.....SR, ED 11, p. 36
Environment pollution calls for a team cure...IEEE, ED 6, p. U100
FCC urges control of 'electronic smog'.....NEWS, ED 1, p. 36
Get to know your local SBA agent...ART, ED 10, p. 106
Intelsat III starts commercial service.....NEWS, ED 4, p. 22
LSI poses dilemma for systems designers.....SR, ED 3, p. 44
Lesson from Apollo: plan for contingencies...EDIT, ED 11, p. 77
Measuring system eases interfacing.....PF, ED 7, p. 106
Microwaves may reduce sewage-treatment costs.....NEWS, ED 10, p. 22
Minicomputer to do skyscraper chores....NEWS, ED 10, p. 22
MIT Alumni Center attacks urban problems....NEWS, ED 4, p. 22
New radar will solve mysteries of storms.....NEWS, ED 4, p. 31
Spring Joint Computer Conference 1970.....SR, ED 9, p. C1
System design means trade-offs.....ART, ED 7, p. 60
Use piezoelectric ceramics.....ART, ED 5, p. 60
Yes, redundancy increases reliability.....ART, ED 12, p. 70
Cards A1 to T48 6-22-70

Test & Measuring

Anemometer aids remote weather stations....NEWS, ED 3, p. 30
Assemble a sequential counter....ART, ED 3, p. 60
Automatic caller reads meters by telephones...NEWS, ED 8, p. 22
Bell to test waveguide communications system..NEWS, ED 4, p. 21
Check flip-flops automatically.....ART, ED 7, p. 66
Check peak fm deviation the easy way....ENG DATA, ED 5, p. 70
Clock and control with TTL.....ART, ED 10, p. 82
Coast-to-coast test for satellite TV..NEWS, ED 2, p. 22
Computerized wiring tester performs 9000 checks/min.....PF, ED 2, p. 108
Computing $750 counter measures 1 Hz to 1 MHz..PF, ED 4, p. 98
Curing engine failures BEFORE they occur.....NEWS, ED 7, p. 30
Electronic network proposed to monitor global pollution.....NEWS, ED 5, p. 21
Electronics makes ski slopes safer..NEWS, ED 1, p. 21
Electronics scores in sports.....SR, ED 11, p. 36
Find the absolute value of bipolar pulses.....IFD, ED 4, p. 84
Four-digit low-cost multimeter checks 5 functions in 30 ranges.....PF, ED 4, p. 97
Gate your op amp.....ART, ED 11, p. 90
Go/no go circuit gives visual indication of RTL logic level.....IFD, ED 4, p. 88
Growing market seen for test equipment.....NEWS, ED 11, p. 21
High-frequency VCO uses TTL gates.....IFD, ED 11, p. 112
Inexpensive generator produces triangle and square waves.....IFD, ED 6, p. 208
Laser beam draws quick and clean patterns for ICs.....NEWS, ED 10, p. 36
Laser makes air visible to aircraft designers...NEWS, ED 11, p. 32
Linear sweep generator uses zener diode.....IFD, ED 12, p. 98
Linear temperature monitor uses silicon diodes as sensor.....IFD, ED 1, p. 124
Linear temperature sensor uses only a single transistor.....IFD, ED 4, p. 86
Low-cost 50-MHz counter doubles as a seven-digit DVM.....PF, ED 2, p. 106
Make sure you pick the right power supply.....ART, ED 4, p. D22
Measuring system eases interfacing.....PF, ED 7, p. 106
Monitor keeps tab on noisy vehicles.....NEWS, ED 1, p. 34
New radar will solve mysteries of storms.....NEWS, ED 4, p. 31
Noise generator simulates radar return-signal 'grass'.....IFD, ED 11, p. 114
Ordinary 3x5 index card makes a handy ruler..IFD, ED 6, p. 212
Over/under voltage monitor is inexpensive and stable.....IFD, ED 3, p. 75
Pilots ask FAA for proximity warner —now.....NEWS, ED 10, p. 32
Portable low-cost DMM checks five functions.....PF, ED 6, p. U140
Simple transistor checker boasts speed and versatility.....IFD, ED 12, p. 96
Slide rule improves VTVM resolution.....IFD, ED 12, p. 98
Spring Joint Computer Conference 1970.....SR, ED 9, p. C1
Symmetrical power supply is adjusted with only one control.....IFD, ED 6, p. 210
Timer/counters + DVM are systems instruments....PF, ED 5, p. 105
Try using VCOs as discriminators..ART, ED 12, p. 86
Use an audible alarm to indicate a blown fuse.....IFD, ED 4, p. 84
Use piezoelectric ceramics.....ART, ED 5, p. 60
Worldwide network to predict solar EMI.....NEWS, ED 13, p. 34
Yes, redundancy increases reliability.....ART, ED 12, p. 70
